Timilehin Falade

Senior Software Engineer: React, TypeScript, Node.js, AWS, fintech

Birmingham, UK · +44 7538 917759 · faladetimilehin@yahoo.com · linkedin.com/in/faladetimilehin · github.com/faladetimilehin · faladetimilehin-resume.netlify.app

PROFILE

Senior Software Engineer with 8+ years building secure, high-scale web platforms across fintech, e-commerce and AI. Spent six years at Nigeria Inter-Bank Settlement System (NIBSS) building frontends for national payment infrastructure: NIBSSPay bulk payments, NQR QR payments and BVN biometric verification. Now builds full-stack, AI-native products with React, Next.js, TypeScript and Node.js, including LLM assistants (Severus/Snape) and Claude SDK integrations. MSc Data Science (UEL, 2026). Open to senior full-stack or frontend roles in the UK, hybrid or remote.

EXPERIENCE

Senior Software Engineer · PerfectScope **Oct 2025 – Present**

Full-time

- Build fintech and e-commerce platforms in React and TypeScript for clients including luxury fashion brand 7thLeo Couture.
- Integrated REST APIs for payment processing, customer authentication, analytics and transaction management.
- Delivered recommendation engines, predictive-analytics dashboards and search features that improve user experience and operational efficiency.
- Work with product managers, designers and backend engineers to scope, build and release features.

Machine Learning Researcher · Outlier **Aug 2025 – Mar 2026**

Part-time · Remote

- Evaluated and improved the reasoning, accuracy and code output of large language models through expert review and structured feedback.

Senior Frontend Developer · Nigeria Inter-Bank Settlement System (NIBSS) **Jan 2020 – May 2026**

Full-time

- Built the frontend for NIBSSPay, a secure bulk payment platform for salaries, remittances and multi-beneficiary transfers used by corporates, banks and government. Included 2FA, account validation and real-time transaction status.
- Built merchant onboarding and customer payment interfaces for NQR, the national QR payments platform, plus USSD merchant payments that work without internet.
- Contributed to the frontend of the BVN biometric verification ecosystem, strengthening customer verification across Nigerian banking.
- Built an in-house authentication system that improved API integration efficiency by 29% and reduced manual operations work.
- Built real-time analytics dashboards over REST and GraphQL APIs. Worked in CI/CD with Dockerised builds, automated deployments and peer code review.

Software Developer · Jethro **Feb 2019 – Dec 2019**

Full-time · United Kingdom

- Helped build a mobile-first bank giving everyone equal access to financial services from their phone, online or offline.
- Built a custom login tool that cut customer signup time by 30% and doubled new signups within 6 months.
- Built a unit-testing setup that cut reported bugs by 11% month over month, and enforced coding standards that cut bug resolution time by 33%.
- Implemented CI/CD pipelines to automate build, test and cloud deployment. Built UI in React/Redux.

System Engineer · Softcom Limited **Mar 2018 – Feb 2019**

Part-time

- Built an ID creation, sharing and authentication tool that cut manual ID processing time by 40%.
- Worked directly with 3 clients to deliver sites that met their needs, with over 95% customer satisfaction.

SELECTED PROJECTS

Severus: AI workspace for teams (severusflow.com) **Developer, Asynk IO team**

- A SaaS workspace for projects, requests and approvals, files, meetings and finance records. Snape, its AI assistant, answers from selected sources and helps draft work. Tiered plans with seats and AI credits.

Baby Connect: UK childminding & parent platform **Solo build · In development**

- Monorepo with a Next.js 14 + TypeScript frontend and an Express API (93 passing tests). Includes role-based access with six roles, GoCardless Direct Debit, BullMQ background jobs on MongoDB Atlas, and AI insights via the Anthropic Claude SDK. Designed with UK GDPR in mind.

Kerry Collins Staff Portal: UK staffing agency platform **Client project**

- Full-stack app with 46 routes on Next.js 14, TypeScript, MongoDB and NextAuth. Covers onboarding, document management, scheduling, bookings, timesheets and two-way messaging for social care and education staff.

SKILLS

Frontend	React, Next.js 14, TypeScript, JavaScript (ES6+), Redux, Zustand, SWR, Tailwind CSS, Vue.js, HTML5, CSS3
Backend	Node.js, Express, REST, GraphQL, BullMQ, NextAuth.js, RBAC
AI & Data	LLM integration, Anthropic Claude SDK, AI assistants, LLM evaluation, machine learning
Cloud & DevOps	AWS, Azure, Docker, GitHub Actions, CI/CD, MongoDB Atlas
Payments	Bulk payments, QR payments, USSD, GoCardless, 2FA
Quality & delivery	Jest, TDD, code review, Agile (Scrum & Kanban), Jira, Confluence

EDUCATION

MSc Data Science, University of East London 2026

Frontend Web Development, University of Birmingham 2023

BSc Computer Engineering, University of Lagos 2018
